 Annual subscription rate is \$2 in United States and Canada.

3 Hot Points to Consider—

Set complete, \$2.50 list. In display carton with stand, solder and paste. Mail a sample order. Also one point irons at \$1.75. Immediate delivery.

1. An unbreakable heating element guaranteed for one year.
2. Three interchangeable copper points.
3. Never-slip handle construction.

The Chapman Co., Terryville, Conn.

A seven league stride in the refinement of radio

THE SUMMIT TUNED RADIO FREQUENCY TOROIDAL TRANSFORMER

Eliminates feed-back and leakage—Has no strayfield

Step by step the causes of radio losses, noise and the other disturbing factors are being eliminated.

The Toroidal Transformer is the latest step in radio progress, and the only radio transformer with closed magnetic circuit and pre-calculated capacity. It was designed in accordance with modern engineering principles by an engineer who for years has concentrated in this field.

Write at once for a sample set of 3 mated Toroidal Transformers, and enjoy the clearest, finest reception ever.

Sold only in mated sets of 3, packed in a handsome display box with complete instructions and designs.

Attractive Discounts

Summit Radio Manufacturing Co., Inc.

Dept. 15

481 Broad Street, Newark, N. J.

Low Losses
Low Distributed Capacity
Correct Radio
Self Neutralized
Self Balanced

THE Gilbert STORAGE "B" BATTERY

Clearer Reception
Greater Distance
More Volume
Noiseless in Action
—the most beautiful "B" Battery made

No acids or disagreeable odors. Will stand untold electrical abuse. The alkaline solution has absolutely no chemical action on the nickel-iron elements, adding years of actual service to the battery. Non-sulphating. No buckling of plates. No fear of overcharging.

Its beautifully finished solid American Walnut Cabinet puts a fine battery in a properly distinctive setting.

Note the sturdy durable method of connecting the elements.

For the dealer earnestly seeking the finest in radio to build up his accessories business there is a splendid proposition in The Gilbert Storage "B" Battery. Write today.

THE GILBERT BATTERY CO.

138 Fayerweather Street
Bridgeport, Conn.

MANUFACTURERS: Is Your Sales Plan *Complete?*

Two efforts are necessary before a sale can be made.

First the *desire* must be created. This is the job of trade publication advertising—through *Radio Retailing*.

But the job is only half done when desire has been created. The second important half of your sales

task is to place before the buyer at the same moment he is ready to buy all the data he needs to place the order.

Give the radio dealer and jobber this buying information, when they need it, through The Radio Trade Directory. The February issue of The Directory is now being prepared.

The Progress of Radio Told by Statistics

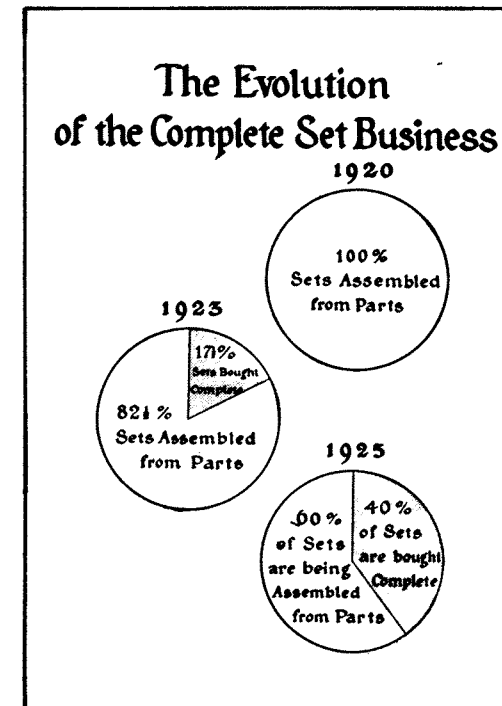

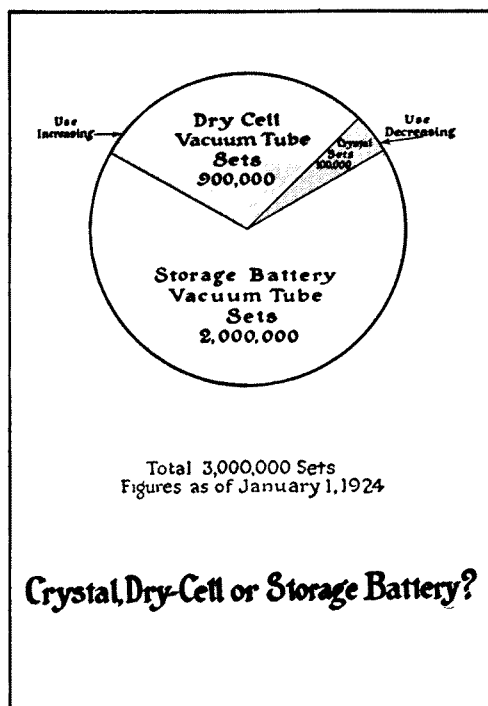

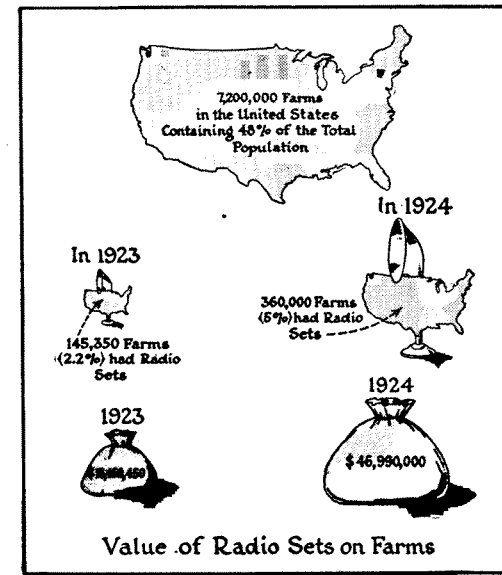

By Arthur P. Hirose
 Director, Research Department,
 "Radio Retailing"

THE growth of the radio industry may be adequately traced by reference to the charts portrayed on this page. The figures are as accurate as it is possible to ascertain at this early stage in radio's development and are, in many instances, the official U. S. Government figures.

The charts were compiled by several of the McGraw-Hill Company's staff of merchandising statisticians who have been placed at the disposal of the radio trade for the compilation of any figures or comparisons the industry desires to have.

Radio dealers, jobbers and manufacturers are at liberty to reproduce any of these figures in their publicity material provided credit is given to *Radio Retailing*.

"Radio Retailing's" Complete Specifications of

BY referring to these lists of radio products, which will be a monthly feature of *Radio Retailing*, the dealer will have at hand a complete reference library of radio equipment and accessories of every description, with full specifications, prices, etc. The list of Radio Sets appeared last month, and other lists will be published in rotation.

series of every description, with full specifications, prices, etc. The list of Radio Sets appeared last month, and other lists will be published in rotation.

For Radio Sets

For Batteries, Chargers and Current-Supply Devices

Help Your Customers to Celebrate "Mothers' Day" Next Month

The sentimental appeal of "Mother's Day"—Sunday, May 10—may be tied up effectively with radio. It almost rivals Christmas as a day of gifts for Mother. What is more natural than a radio set with which to brighten her declining years? Spread the idea in your advertising, your window displays and

your store interior, too, if possible. This photograph, suggested by the painting, Whistler's "Mother," is used through the courtesy of the Eureka Electric Company, Eureka, Cal. Remember this slogan for Mother's Day—"Has She a Radio?"

"Radio Retailing's" Complete Specifications of

LISTINGS of radio products, with the name and address of the manufacturer, together with complete information concerning each product is a monthly feature of *Radio Retailing*. This service is wholly for the benefit of readers and is without charge of any kind whatsoever to the manufacturers listed. It is *Radio Retailing's* desire to make these lists a complete, representative

directory of radio products, so that, by keeping and filing the lists each month, the dealer will always have at hand the information he wants to know about any radio set, reproducer or accessory. Manufacturers are invited to send specifications of their products for representation in these lists, which will be revised, brought up-to-date and published in rotation.

For Radio Sets—See February Issue, Pages 154-159

For Loud Speakers, Earphones and Phonograph Units—See March Issue, Pages 252-255

For Portable Receivers and Loop Aerials—See the next—the May—issue.

Listings of various parts are now being prepared for publication next fall

"Catch Them Outdoors" This Month and Throughout the Summer

If the usual excuse given for a slump in radio during the spring and summer months is the fact that people do not then remain indoors, the answer, in the opinion of L. W. Chaffee of Visalia, Calif., is to "catch them while they are out-of-doors."

Mr. Chaffee has designed a service car with antenna on top and outlets for connecting up

a set in the rear. On pleasant evenings, he backs the car up to the curb, either in front of his store or elsewhere where people congregate and connects up one of the makes of sets from his stock. With the aid of a loud-speaker a radio concert is given for the benefit of the sidewalk crowds and the strolling couples in different sections of the city.

"Radio Retailing's" Complete Specifications

LISTINGS of radio products, with the name and address of the manufacturer, together with complete information concerning each product is a monthly feature of *Radio Retailing*. This service is wholly for the benefit of readers and is without charge of any kind whatsoever to the manufacturers listed. It is *Radio Retailing's* desire to make these lists a complete, representative

directory of radio products, so that, by keeping and filing the lists each month, the dealer will always have at hand the information he wants to know about any radio set, reproducer or accessory. Manufacturers are invited to send specifications of their products for representation in these lists, which will be revised, brought up-to-date and published in rotation.

For Radio Sets—See February Issue, Pages 154-159

For Loud Speakers, Earphones and Phonograph Units—See March Issue, Pages 252-255

For Batteries, Chargers, Eliminators and Power Units—See April Issue, Pages 360-365

For Makers of Assembled Kits—See the Next—the July—Issue

Radio Retailing's Offices in London — Center of British Radio Buying

Situated at No. 6 Bouverie Street, just off famous Fleet Street, the McGraw-Hill English headquarters are in a section of London that abounds with historic lore. Nearby is the Blackfriars' Bridge across the Thames, Ludgate Hill, St. Dunstan's Church, the Law Courts and Record Office.

This Issue Goes to Radio Trade of Europe, the Orient and South America

In addition to its regular monthly international coverage, several thousand extra copies of this month's edition of "Radio Retailing" are being mailed to an especially prepared list of radio dealers and jobbers all over Europe, the Orient, Africa and South America.

"Radio Retailing's" Complete Kit Specifications

LISTINGS of radio products, with the name and address of the manufacturer, together with complete information concerning each product is a monthly feature of *Radio Retailing*. This service is wholly for the benefit of readers and is without charge of any kind whatsoever to the manufacturers listed. It is *Radio Retailing's* desire to make these lists a complete, representative

directory of radio products, so that, by keeping and filing the lists each month, the dealer will always have at hand the information he wants to know about any radio set, reproducer or accessory. Manufacturers are invited to send specifications of their products for representation in these lists, which will be revised, brought up-to-date and published in rotation.

Paid Circulation Leadership in Six Months

8,055 Paid Subscribers to "Radio Retailing"

NO ONE will purchase a railroad ticket or commodity unless he expects to use it. And likewise, no merchant will subscribe to a business paper in his respective field unless he expects to stick in that line. This is particularly true in radio where the turnover in some cities reaches as high as 40 per cent.

The majority of the radio merchants who fall by the wayside can to a great extent anticipate the length of their business lives, and thus gauge their expenditures accordingly.

Bearing this fact in mind, the editors of *Radio Retailing* feel that no greater tribute to their effort could be had than the 8,055 paid subscriptions which have been rolled up the last six months—all during the "off-season."

This list of readers represents one of the greatest forces in radio merchandising—the better and stable types of merchants who, despite "gypps," "slumps," and "dumping," have made up their minds to stick to their guns and see the situation through.

Radio Retailing welcomes these stickers who are joining our family of readers at the rate of more than 1,000 a month. It's a safe bet that they'll be well up in front when the in-door season returns this fall.

What the Trade is Talking About	174

As Gold Is Given the Assayer's Test—

so a magazine must pass through the crucible of its readers' judgment. For the past seven months, *Radio Retailing* has been "on trial" before the radio trade. It is gratifying, therefore, that letters such as the one on this page and those on pages 166 and 167, are being sent, voluntarily, to the offices of *Radio Retailing*, by men who have staked their fortunes on radio and made it their lifework.

Radio Retailing,
New York City.

Gentlemen:

Will you kindly send one year's subscription to each of the following firms, if not on your subscription list already. They are dealers of ours and we feel they should have "Radio Retailing," as it is the best we have seen thus far.

Will you send each dealer a letter informing them that we are presenting the year's subscription with our compliments?

"Radio Retailing's" Complete Specifications

Listings of radio products, with the name and address of the manufacturer, together with complete information concerning each product is a monthly feature of *Radio Retailing*. This service is wholly for the benefit of readers and is without charge of any kind whatsoever to the manufacturers listed. It is *Radio Retailing's* desire to make these lists a complete, representative

directory of radio products, so that, by keeping and filing the lists each month, the dealer will always have at hand the information he wants to know about any radio set, reproducer or accessory. Manufacturers are invited to send specifications of their products for representation in these lists, which will be revised, brought up-to-date and published in rotation. For batteries,

battery chargers, eliminators and power units, see April issue, pages 360-365. For portable receivers and loop antennas, see May issue, pages 448-451. For makers of knock-down sets in kit form, see June issue, pages 545-546. For revised, up-to-date list of reproducers, earphones and phonograph units, see September issue. Late additions to set listings will also appear.

100% Service to the Radio Industry

EVERY McGraw-Hill publication has been founded on the solid cornerstone of "Service to the industry it represents." Engineering, mining, electricity, chemistry, transportation, the merchandising of electrical appliances, and now radio, are the fields served by McGraw-Hill papers.

In radio, as in each of the other fields, McGraw-Hill is striving to provide a complete service. How complete it is may be gleaned from the following facts:

McGraw-Hill is publishing *Radio Retailing*, "The Business Magazine of the Radio Industry," issued monthly and devoted to the trade of selling radio, and The Radio Trade Directory, listing every known radio product and radio manufacturer, and issued quarterly.

Radio Retailing has the largest total circulation of any similar magazine; *Radio Retailing* has also built the largest paid circulation, 10,154 as of September 5, 1925; *Radio Retailing* is looked upon as the leading radio trade publication; and this after eight months of existence.

The publishers of *Radio Retailing* have branch offices in six United States cities and one in Europe; *Radio Retailing* has correspondents all over the country; *Radio Retailing* has the most accurate and thorough lists of radio dealers; *Radio Retailing* has the most intensive contact with the trade, through its large staff of editors and editorial representatives who are constantly covering all sections of the country; *Radio Retailing* and The Radio Trade Directory carry on the closest correspondence with the radio trade through their mailing department, which handles more than 50,000 individual pieces of mail every month, all of which is personal correspondence of these two publications with the radio industry. This is exclusive of the 250,000 monthly circulars, surveys, questionnaires, wrappers and other material also handled by the mailing department.

Radio Retailing, through this efficient mailing list and mailing department, is in a better position to conduct surveys of the trade and secure widespread and representative opinions on any matter of radio interest, and does actually accomplish more of that type of service than possibly any trade publication in any field.

Radio Retailing and The Radio Trade Directory employ over seventy field circulation men who are visiting practically every city and town in America for the purpose of keeping these two publications in constant touch with the retail and wholesale radio trade, and who, by means of daily reports, keep dealer lists up-to-date and keep the home office fully informed as to conditions in the field.

"Radio Retailing's" Complete Specifications of Speakers, Head Sets and Phonograph Units—Season 1925-1926

Specifications of radio products, with the name and address of the manufacturer, together with complete information concerning each product is a monthly feature of *Radio Retailing*. This service is wholly for the benefit of readers and is without charge of any kind whatsoever to the manufacturers listed. It is *Radio Retailing's* desire to make these pages a representative directory of radio products, so that, by

keeping and filing them each month, the dealer will always have at hand the information he wants to know about any radio set, reproducer or accessory. Manufacturers are invited to send specifications of their products for representation in these tables, which will be revised, brought up-to-date and published in rotation. For batteries, battery chargers, battery eliminators and power units, see the next (October)

issue. For radio receivers, season 1925-26, see August issue, Pages 160-165, with supplement in this issue, Page 317. For makers of knock-down sets in kit form, See June issue, Pages 545-546. For portable receivers and loop antennas, see May issue, Pages 448-451. Complete listings of all radio manufacturers and products appear in the Radio Trade Directory, published quarterly by the McGraw-Hill Company.

Reproducer

Radio Retailing, September, 1925

"Eyther-Way" is the name of the reproducer manufactured by the Bee-Zee Products Company, New Haven, Conn. It is a combination loud speaker, phonograph attachment or ear phones. The attachments used to accomplish this conversion, are shown in the illustration. Crystallized black is the standard finish of the reproducer, while the base is a casting of 8 3/4 in. diam. weighing 3-lb. The horn has a 12-in. bell and is 22 1/2 in. high. Intended retail price, complete with attachments, is \$16.50.

Reproducer

Radio Retailing, September, 1925

The Homer P. Snyder Manufacturing Company, Little Falls, N. Y., is manufacturing a horn type reproducer made from a new non-resonant metal. The manufacturer claims to have solved the question of cross current interferences in the amplification of sound waves in this reproducer. It is made in but one size, and the coloring is a special shade of neutral brown, which will harmonize perfectly with any color scheme or home setting. Standing 22 in. high, it is equipped with a 15-in. bell, and has an intended retail price of \$18.

Supplementary Specifications of Radio Receivers, Season 1925-26

Specifications of Batteries	522

Broadcasting of News May Prove Radio's "White Hope"

RADIO is a public utility only to the farmer. He uses it for weather and market reports. With him it is in a class with transportation, telephones, newspapers, etc. Its service appeal is on a par with its enjoyment or luxury appeal.

To the city dweller, radio as a public utility is still a misnomer. It is only a few laps ahead of the phonograph or player piano. Generally speaking, the public thinks of it solely in terms of entertainment.

Can this conception be changed by making radio an adjunct of the newspaper? Brief, last minute news reports "on tap" at definite periods throughout the day, including the time when the head of the home is at his breakfast table, offer a means of keeping listeners-in interested in radio all year 'round.

* * * *

A discussion of this subject from the viewpoint of the trade, newspaper publishers and broadcasters will appear in an early issue.

Complete Specifications of Batteries—Season 1925-1926

Specifications of radio products, with the name and address of the manufacturer, together with complete information concerning each product is a monthly feature of *Radio Retailing*. This service is wholly for the benefit of readers and is without charge of any kind whatsoever to the manufacturers listed. It is *Radio Retailing's* desire to make these pages a representative directory of radio products, so that, by

keeping and filing them each month, the dealer will always have at hand the information he wants to know about any radio set, reproducer or accessory. Manufacturers are invited to send specifications of their products for representation in these tables, which will be revised, brought up-to-date and published in rotation. For battery chargers and battery eliminators, see the next (November) issue. For loud

speakers, earphones and phonograph units, see September issue, pages 291-294. For radio receivers, season 1925-26, see August issue, pages 160-165. For makers of knock-down sets in kit form, see June issue, pages 545-546. For portable receivers and loop antennas, see May issue, pages 448-451. Complete listings of all radio manufacturers and products appear in McGraw-Hills' Radio Trade Directory.

What Is the Editor's Responsibility?

Extracts from an address by E. J. Mehren, Vice-President of the McGraw-Hill Company before the annual convention of the National Industrial Advertisers' Association, Atlantic City, October 19, 1925.

THE editor's job, primarily, is to provide reading matter. His task is, first, to cover the field adequately so that all information of first importance gets into his pages, and, second, to build up such a reputation for the paper's integrity that the reader will persistently turn to it for information and guidance.

Strictly interpreted, the editor has no responsibility to the advertiser. It is with the reader, not the advertiser, that he makes a covenant, when his publisher takes the subscription money, to render comprehensive and disinterested service.

He does have, however, a responsibility to the manufacturer. The manufacturer is part of the industry. He supplies the material and tools with which the industry works. He is as much part and parcel of it as the consumer; without him the industry could not exist. What he does for the improvement of materials, machines, processes and services, is vital to the industry, and, therefore, to the executives and workers, who are the readers that the editor serves. It follows, then, that the editor is bound, in order that he may interpret to the reader the developments and progress made

in the manufacturing end of the industry, to keep close to the manufacturers and to record the progress they are making.

BUT that responsibility is to the manufacturers as a whole. The manufacturer who chooses to advertise does not thereby acquire a claim to reading space over and above that of any other manufacturer.

It necessarily follows that if the editor holds a special feeling of obligation to an advertiser because he advertises; if he would print something for the advertiser that he would not print for a non-advertiser who has an equally meritorious proposition, he would violate his covenant of honesty and truth with the subscriber. The bars once let down—the principle thrown to the winds—there is no reason why the editor, on behalf of his advertising department, should not freely trade reading space for advertising patronage.

If, then, editors and publishers jealously refuse to trade their reading pages for advertising orders, it is not because they want to erect artificial standards, or because they are out of sympathy with the efforts of a manufacturer to secure the widest possible dissemination of his story. It is because the very medium that the advertiser values would be destroyed if subserviency of the editor to the advertiser were to prevail.

Money in your pocket—the Master Fore Battery Charger

Rapid turnover with a handy margin of profit for you. For your customers, a dependable and economical battery charger for practically every requirement. The Master Fore Battery Charger charges any 6-volt Radio or Automobile Battery, also Radio "B" Batteries up to 48-volts in series and up to 120-volts in multiple. Easily operated by anyone—a big sales builder for you.

Fill in, clip and mail the coupon now—**TODAY**

Manufactured by **Fore Electrical Mfg. Co.** 5255 N. Market Street, St. Louis, Mo.

Table of Contents, December, 1925

It's a Merry Christmas for the Radio Man— Here's Why <i>The Editors of Radio Retailing Send You a Message of Good Cheer and Bright Prospects for 1926.</i>	797	This Business of Ours <i>A Housecleaning Is Due and It Will Improve Matters All Around — Radio Developments of Past Year Discussed.</i>	817
Demonstrations Close the Sale <i>Indiana Dealer Saves Time and Money by Demonstrating Sets in His Own Home Rather than at the Prospect's.</i>	798	Bringing Women Into the Store <i>Rochester Dealer Pays Women's Club Treasuries Fifty Cents for Every Member Who Attends His Group Demonstrations.</i>	820
Handling the Christmas Rush <i>Some Timely Hints and Suggestions on Store Arrangement and "Things to Do" to Make Holiday Buying Easier.</i>	801	Listeners' Association Solves "Interference" Problems <i>Indianapolis Fans Organize to Bring About Better Broadcasting and Reception Conditions in Their Community.</i>	822
How Three Music Stores Sell Radio <i>The Sales Methods of Three Stores Representing Probably the Highest Type of Radio Merchandising Today.</i>	802	"No Cut Price Sales" <i>Pacific Coast Department Store Is Making Money Out of Radio without Resorting to Cut Prices—Proving It Can Be Done.</i>	826
Broadcasting Boosts Sales <i>The Bell Radio Company, of Birmingham, Believes Its Broadcasting Station Is a Big Factor in Its Success.</i>	806	What an Electrical Inspector Demands in a Radio Installation <i>Chief Electrical Inspector of Chicago Explains What the National Code Requires When Installing a Radio Receiver.</i>	828
Service Insurance Policies <i>"Coupons with Every Set Sold" Is the Way a San Francisco Dealer Keeps His "Free Service" Costs to a Minimum.</i>	808	Departments	
Standardization Will Help Every Dealer <i>A. J. Carter, of the R. M. A., Tells What the Association Is Doing to Bring About the Standardization of Apparatus.</i>	810	The Editors Have This to Say— <i>Business is 14 per Cent Better—No "Easy Money" in Radio — Service Brings Them Back.</i>	830
How to Sell Straight Line Frequency Condensers <i>Prominent Radio Dealer-Engineer Explains Some of the Selling Points of the "Ultimate" in Condenser Design.</i>	811	What's New in Radio and Where to Buy It <i>New Radio Products for the Dealer to Sell, with Description, Price and Name and Address of the Manufacturer.</i>	832
"Smith of Leroy" <i>He Puts a Few Sets in a Sleigh, Takes Them Out to the Snowbound Farmers, Leaves Them, then Goes Back and Collects.</i>	813	What the Trade Is Talking About <i>News of the Month, from the Four Corners of the Country, Boiled Down to Essential Facts.</i>	838
"Interference" Main Topic at Hoover Conference <i>High Spots of the November Conference at Washington Concisely Presented—Hoover Asks Aid in Solving Wavelength Muddle.</i>	814	Complete Specifications of Condensers <i>"Radio Retailing" Continues Its Listings of Apparatus with Information about Current Types of Variable Condensers.</i>	843
		Dealer Helps the Manufacturers Offer <i>Literature, Counter and Window Displays and Other Material Manufacturers Are Putting Out for Dealers.</i>	847

"Radio Retailing's" Complete Specifications of Variable Condensers—Season 1925-1926

Specifications of radio products, with the name and address of the manufacturer, together with complete information concerning each product is a monthly feature of *Radio Retailing*. This service is wholly for the benefit of readers and is without charge of any kind whatsoever to the manufacturers listed. It is *Radio Retailing's* desire to make these pages a representative directory of radio products, so that, by keeping and filing them each month,

the dealer will always have at hand the information he wants to know about any radio set, reproducer or accessory. Manufacturers are invited to send specifications of their products for representation in these tables, which will be revised, brought up-to-date and published from time to time. For battery chargers, battery eliminators and power units, see the next (January) issue. For batteries, see October issue, pages 521-526. For speakers,

head sets and phonograph units see September issue, pages 291-294. For radio receivers, season 1925-1926, see August issue, pages 160-165, with supplement in the September issue, page 317. For makers of knock-down sets in kit form, see June issue, pages 545-546. For portable receivers and loop antennas, see May issue, pages 448-451. Complete listings of all radio manufacturers and products appear in the McGraw-Hill Radio Trade Directory.

SLF—Straight Line Frequency.
SLC—Straight Line Capacity.

SLW—Straight Line Wave Length.
M—Modified.

S—Semi.
Al—Aluminum.

Standardization Will Help Every Dealer

(Continued from Page 810)

3. Should all dials and knobs have the same size holes, and if so, what size do you recommend?

4. How far should condenser shafts project through the panel?

The report of the Standards Committee and of the sub-committee chairman will be made at the May, 1926, meeting of the Radio Manu-

facturers' Association to be held at Atlantic City, New Jersey.

Radio dealers have, in self defense, helped a great deal in this standardization process. A dealer who has a stock of condensers that have quarter-inch shafts will hesitate before ordering many knobs or dials that will only fit three-sixteenths inch shafts. This lessens the demand for the smaller-sized dials and automatically takes a step toward standardization. We need this form

of co-operation and will appreciate any dealer's ideas along this line. Readers of *Radio Retailing* are invited to mail me their suggestions, addressed to me at the Carter Radio Company, 300 South Racine Street, Chicago.

Our ultimate aim is to standardize every part that enters into the construction of a radio set. We have every assurance that our standards will be followed by the radio industry as a whole.

Solderless EUREKA Solderless Aerial Lead-in Clamp

Nine out of ten sets now have poor connections between aerial and lead-in wire. The Eureka clamp makes a connection superior to most soldered jobs with one-tenth the trouble.

25c. each

Packed 20 to the standard package listing at \$5.00 per package.

Jobbers—Write us for latest prices on these fast moving items.

C. W. Butts, Inc., 44 Hedden Pl., EAST ORANGE, N. J.

EUREKA DIAL POINTERS

Are now made in three types. Eureka 51 to card list, \$5.00. Eureka, Jr., 52 to card list \$5.00 D-X Owl 34 to card list \$3.40 for nickel and \$5.00 for gold plated. Our attractive display cards, and the beautiful finish of our pointers make them sell.

D-X OWL EUREKA JR.

SUP-R-POWR RADIO RECEIVER

Retails for \$2.50 Order Quantity Today

Sell this crystal receiver to a customer and you have prepared the way for the sale of a tube set later on—

Two profits Instead of One!

The Sup-R-Powr is a real radio. Brings in all stations within 25-35 miles radius; of highly polished nickel; looks like \$10 merchandise. All terminals plainly visible. As for the crystal, there is none finer—looks like a jewel, works like a charm.

CHERRINGTON RADIO LABORATORIES Waukegan, Illinois
